

Volume 128, 2000

No. 1	January	3–260	No. 7	July	1993–2612
No. 2	February	261–508	No. 8	August	2613–3024
No. 3	March	509–916	No. 9	September	3025–3356
No. 4	April	917–1204	No. 10	October	3357–3708
No. 5	May	1205–1576	No. 11	November	3709–3940
No. 6	June	1577–1992	No. 12	December	3941–4192

Corrigenda: 1573, 2608–2609

Section A. Index to Contributions by Author

Notes and Correspondence are indicated by asterisks.

Readers are encouraged to browse AMS journals online to search titles and abstracts of articles referred to in the index below by visiting the AMS Web site (<http://www.ametsoc.org/AMS>).

Section B. Subject Index

- Acoustic tomography, error estimates for an ocean general circulation
model, 763
- Adaptive grids, using wavelet analysis in ocean modeling, 1536
- Adjoint methods, FSUGSM 4DVAR performance with different
adjoint physics strategies, 668
- Advection
 evolution of small-scale filaments in an adaptive advection
 transport model, 2976
 laboratory evaluation, axisymmetric flow semi-Lagrangian
 advection schemes, 2835
 lateral boundary conditions for semi-Lagrangian schemes, 4084
- Advection–diffusion equation, 1D numerical solution in layered
coordinates, 2575
- Advection schemes
 single-cell high-order semi-Lagrangian scheme, 1165
 spurious diapycnal mixing associated with advection in an ocean
 model, 538
 unconditionally stable scheme for the shallow water equations, 810
- Africa
 large-scale environments of mesoscale convective complex global
 populations, 2756
 sign reversal climatology for the meridional potential vorticity
 gradient, 3890
 systematic errors of the ECMWF operational model over tropical
 Africa, 1949
- Ageostrophic circulations
 easterly gap flow through Juan de Fuca Strait, 2398
 modeling and analysis of ageostrophic circulation during
 SEMAPHORE, 2270
- Aircraft observations
 airborne Doppler observations of a cold front upstream of steep
 coastal orography, 1577
 airborne radar observations of a cold front during FASTEX, 2447
 effect of small-scale variability on thunderstorm initiation, 4017
 identification of dynamical processes at the tropopause using lidar
 observations, 3252
 structure and evolution of hurricane inner cores observed by
 airborne radar, 1653
- Air–sea interactions
 2D coupled atmosphere–ocean model study of a cold air outbreak,
 973
 effect of hurricane–ocean interaction on real-case hurricane
 intensity, 917
- influence of large-scale initial mixed-layer depth on tropical
cyclones, 4058
simulating air–sea interactions during high winds using coupled
models, 2190
- ALADIN
 background error covariances over Morocco, 3927
 estimating forecast error covariances in a
 limited-area model, 644
- Altimeter data, error estimates for an ocean general circulation model,
763
- Anabatic winds, observations of diurnal winds in the Himalayan Kali
Gandaki Valley, 1106
- Analysis of observations, assimilation of satellite imager data and
surface observations, 434
- Analytic models, quasi-steady PBL model with eddy-diffusivity
profile and nonlocal fluxes, 824
- Anelastic models, an anelastic nonhydrostatic model in terrain-
following coordinates, 2108
- Annual summaries
 Atlantic tropical systems of 1996 and 1997: years of contrast, 3695
 eastern North Pacific hurricane season of 1998, 2990
- ARPEGE, assimilation of soil and surface variables in global NWP,
997
- ARPS model
 investigation of convection behind the Cape Canaveral sea-breeze
 front, 3437
 simulation of a round jet and a plume in a regional atmospheric
 model, 4108
 simulation of transitions in boundary layer convective structures,
 3283
- Asia
 observations of diurnal winds in the Himalayan Kali Gandaki
 Valley, 1106
 orographic effects on a squall line system over Taiwan, 1123
 pronounced continental-scale diurnal mode of the Asian
 summer monsoon, 462
 response of the Indian summer monsoon to the El Niño of the
 century, 1778
 simulating vortex development in summer monsoon onset using
 NORAPS, 1604
 simulation of monsoon disturbances in the LMD GCM, 3752
- Assimilation
 four-dimensional variational assimilation of heterogeneous

- observations, 619
- satellite imager data and surface observations, 434
- SSM/I-derived surface rainfall and total precipitable water, 509
- Atmosphere-ocean modeling, study of air-sea interactions during cold air outbreak, 973
- Atmospheric boundary layer
 - marine atmospheric boundary layer properties from satellite-borne SAR imagery, 1506
 - structure and variability of the marine atmosphere around Santa Barbara, 261
- Australia
 - large-scale environments of mesoscale convective complex global populations, 2756
 - radar characteristics of thunderstorms in the Sydney area, 3308
 - sign reversal climatology for the meridional potential vorticity gradient, 3890
- Autocovariance, estimating forecast error covariances in a limited-area model, 644
- AVHRR data, use in 1D variational retrieval of cloudy TOVS data, 3867
- Axial jets, clarification of vortex breakdown and tornadogenesis, 888
- Axisymmetric flow, laboratory evaluation of semi-Lagrangian advection schemes, 2835
- Background errors, Aladin model background error covariances over Morocco, 3927
- Barnes analysis, adaptation of, applied to objective analysis of radar data, 3050
- Barotropic models, tropical plumes due to Rossby wave generation, 2288
- Biharmonic operators, biharmonic friction for use in large-scale eddy-permitting ocean models, 2935
- Blocking, over the South Pacific and Rossby wave propagation, comment, 4160; reply, 4162
- Bogus data, a variational assimilation scheme for landfalling hurricanes, 2252
- Bombs
 - ensemble simulations of explosive cyclogenesis at ranges of 2-5 days, 2920
 - precursors to ordinary and explosive development in the western Pacific, 851
- Bores, coastally trapped wind reversals related to marine boundary layer inversion, 283
- Boundary layer
 - coastally trapped wind reversals related to marine boundary layer inversion, 283
 - description and single-column model tests of a boundary layer mixing scheme, 3187
 - enhanced low-level stratus in the FSU coupled ocean-atmosphere model, 3083
 - large-scale structure of marine boundary layer along California and Oregon, 1632
 - marine boundary layer properties from satellite-borne SAR imagery, 1506
 - modeling and analysis of ageostrophic circulation during SEMAPHORE, 2270
 - new bulk microphysical approach to marine boundary layer clouds, 229
 - pseudoadiabatic adjustment of turbulence for a 1D nighttime stratocumulus case, 2317
 - quasi-steady PBL model with eddy-diffusivity profile and nonlocal fluxes, 824
 - sensitivity of tropical cyclone simulations to boundary layer parameters, 3941
 - simulation of transitions in boundary layer convective structures, 3283
 - structure and variability of the marine atmosphere around Santa Barbara, 261
 - tests of a boundary layer mixing scheme in climate and mesoscale models, 3200
 - volume-of-fluid method test on simulations of marine boundary layer clouds, 1960
- Bow echoes, origin of severe winds in a tornadic bow-echo storm in northern Switzerland, 192
- Brightness temperature, tropical plumes in a barotropic model due to Rossby wave generation, 2288
- Buoyancy, simulation of dynamically induced vertical motion in Hurricane Andrew (1992), 3772
- Buoy observations, generalized inverse of an ocean model and tropical atmosphere-ocean data, 1757
- California
 - dynamics of a Catalina eddy revealed by numerical simulation, 2885
 - large-scale structure of marine boundary layer along California and Oregon, 1632
- CaPE project, the effect of small-scale variability on thunderstorm initiation, 4017
- Case studies
 - association of significant tornadoes with a baroclinic boundary, 174
 - mesoscale structure of a nocturnal dryline and a frontal-dryline merger, 3824
 - origins and mechanisms of eastern Pacific tropical cyclone genesis, 125
 - simulation of dynamically induced vertical motion in Hurricane Andrew (1992), 3772
- Catalina eddy, dynamics revealed by numerical simulation, 2885
- Categorical forecasts, comparative forecast evaluation: graphical Gaussian models and sufficiency relations, 1912
- CCOPE project, orographic density current generation of gravity waves during, 2777
- Central America
 - dynamical considerations of jets off the Central American Pacific coast, 2019
 - statistical characteristics of jets off the Central American Pacific coast, 1993
- Charnock parameter, regional model sensitivity to roughness and need for ensemble calculations, 3631
- Chemical tracers
 - formulation of Kalman filter assimilation of stratospheric chemical tracers, 2654
 - results of Kalman filter assimilation of stratospheric chemical tracers, 2672
- Chemistry
 - atmospheric, cross-tropopause air mass fluxes at midlatitudes, 4045
 - atmospheric, formulation of Kalman filter assimilation of stratospheric chemical tracers, 2654
 - atmospheric, results of Kalman filter assimilation of stratospheric chemical tracers, 2672
 - atmospheric, wavelet-based atmospheric pollution modeling: algorithm development, 3169
- China
 - large-scale environments of mesoscale convective complex global populations, 2756
 - simulating vortex development in summer monsoon onset using NORAPS, 1604
- Circulation
 - monsoonlike circulation in zonally averaged numerical models, topography, 779
 - role in intensification of low-level jets during mesoscale convective system development, comment, 495
- Classification, of extratropical cyclogenesis events in the South Pacific Ocean, 1089

- CLASS scheme, role of land surface schemes in short-range, high-resolution forecasts, 3605
- Climate models, tests of a boundary layer mixing scheme in climate and mesoscale models, 3200
- Climate prediction
- ensembles of two-tier predictions and simulations of circulation anomalies, 3589
 - forecasting eastern Mediterranean droughts, 3618
 - multiseasonal hindcasts for 1972–92, 1474
 - neural network training for prediction of climatological time series, 1456
 - regional spectral model embedded within a coupled ocean–atmosphere model, 689
- Climatology
- 25-yr U.S. climatology of large-amplitude hourly surface pressure changes, 51
 - cause of the onset of the 1997–98 El Niño, 2601
 - climatological relationships between tropical cyclones and rainfall, 3329
 - climatology of freezing rain in the Great Lakes region of North America, 3574
 - estimating maximum storm intensity of cyclones, 746
 - intraseasonal modulation of summer precipitation over North America, 1490
 - origin zones for Great Lakes cyclones, 1899–1996, 474
 - sign reversal climatology for the meridional potential vorticity gradient, 3890
 - U.S. heavy rain event climatology from hourly precipitation observations, 1194
- Cloud microphysics, microphysical retrieval of continental low-level stratiform clouds, 2511
- Cloud observations, life cycle of deep cloud systems over the Indian region, 4071
- Cloud parameterizations
- enhanced low-level stratus in the FSU coupled ocean–atmosphere model, 3083
 - impact of coarse-grid parameterization on fine-grid resolved convection, 2211
 - NWP cloud initialization using GOES sounder data and improved cloud models, 3911
 - response of the ECMWF model to changes in the cloud overlap assumption, 1707
 - volume-of-fluid method test on simulations of marine boundary layer clouds, 1960
- Cloud patterns, a pronounced continental-scale diurnal mode of the Asian summer monsoon, 462
- Cloud predictions, cloud predictions diagnosed from global weather model forecasts, 3538
- Cloud-resolving models
- cloud-resolving, limited-area, and large-scale model cold front simulations, 3218
 - impact of coarse-grid parameterization on fine-grid resolved convection, 2211
 - impact of dimensionality on long-term cloud-resolving model simulations, 1521
 - simulations and radar observations of a tropical squall line, 3709
- Cloud retrieval, microphysical retrieval of continental low-level stratiform clouds, 2511
- Cloud shading, assimilation of satellite imager data and surface observations, 434
- Cloud water, scheme for calculating the liquid fraction in mixed-phase stratiform clouds, 1070
- Clouds and radiation
- impact of dimensionality on long-term cloud-resolving model simulations, 1521
 - microphysical retrieval of continental low-level stratiform clouds, 2511
 - pseudoadiabatic adjustment of turbulence for a 1D nighttime stratocumulus case, 2317
 - response of the ECMWF model to changes in the cloud overlap assumption, 1707
 - temporal–spatial sampling impact on ECMWF analysis/forecast radiation field, 876
- CMC, moist-convective and stratiform precipitation in variational assimilation, 109
- COAMPS, simulation of a low-level jet over complex terrain in southern Iran, 1309
- Coastal meteorology
- airborne Doppler observations of a cold front upstream of steep coastal orography, 1577
 - coastally trapped wind reversals related to marine boundary layer inversion, 283
